MACHINERY & OPERATOR HIRE

THE CONTRACT MACHINERY SPECIALISTS

We are continually integrating the latest technology into our extensive pool of contract machinery and viticultural equipment.

We are currently one of only two companies in Western Australia who own a KLIMA Pruning System and are currently the only company in Australia to have taken delivery of the new Ero Grapelinier Selective Harvester.

Our operators are all experienced and highly-trained with specialized knowledge of the machines they are operating.

“Machinery Logistics have successfully met all our machinery requirements across multiple sites. Their ability to dovetail machinery operations around their in-house labour hire teams means no matter what the season they perform the work expertly, efficiently and within budget.”
